

Jericho Marginal Wharf

* Previously with Sharp & Diamond Landscape Architecture

Jericho Beach Park is one of Vancouver's most active and lively waterfronts. Known for its sandy beaches, people come to the park to learn to sail, picnic, play beach volleyball, and enjoy the waterfront festivals and large open spaces. As a member of Sharp & Diamond Landscape Architects, Bryce consulted with the public stakeholders, developed master plans, regulatory application, detailed design, costing, phasing, and tender services to facilitate the removal of the Jericho Marginal Wharf, restore the foreshore beach and parklands. Based on the public feedback, workshops, and design options, the long term plan removes the wharf, restores the natural beach, improves beach access, re-uses original railings, acknowledges RCAF history, enhances habitat while expanding flexible useable park spaces.

Client: Vancouver Parks Board

Location: Vancouver, BC

Budget: \$3M

Completed: 2014
