

MEC Head Office

* Previously with Sharp & Diamond Landscape Architecture

MEC Headquarters is a next-generation green building that encourages employee health, drives innovation and is designed to meet one of the world's highest green standards, LEED Platinum.

Sustainable features include natural lighting, energy efficiency and monitoring, passive cooling, heating and ventilation, and a high-performance building envelope.

Bryce worked closely with Proscenium, MEC and the rest of the consultant team to deliver a project with a range of outdoor amenities including sustainable water management, extensive landscaping, walking paths, custom seating, public art installations and a rooftop patio with vegetable planters and fruit trees for staff and visitors.

A "blue roof" captures rainwater in a 7,700 gallon underground cistern.

Client: Mountain Equipment Co-Op

Location: Vancouver, BC

Budget: \$12,000,000

Completed: 2013
